

**LSUHSC School of Public Health Environmental Education Internships  
Spring 2017**

ENHS will award 5 - \$1000 stipends to MPH students in ENHS and/or BCHS to contribute to an EPA Environmental Education grant for spring 2017. Students will assist in the development of a high school curriculum that will cover multiple disciplines including environmental science, policy and communications. The expectation is the students receiving these stipends will work to develop the curriculum and also work directly with partner schools over the course of the semester under the direction of the project. Interested students can send their resumes to [eeproject@lsuhsc.edu](mailto:eeproject@lsuhsc.edu)
