

LSU School of Public Health's Mission

The LSU School of Public Health's mission states that our goal is for "a healthier Louisiana with a workforce addressing the core functions of public health, equipped with data and knowledge, and supported by LSU's faculty, students and staff." Your education here will give you hands-on, practical experience to make the world a healthier place.

Gender & Diversity

One of the goals of the LSU School of Public health is to prepare students to address the changing needs of society, diverse in economic status, race/ethnicity, religion, sexual orientation and sexual identity.

With a population that reflects that of the state of Louisiana, we are training the next generation of Public Health workers in a way that reflects the community we call home.

Epidemiology
MPH and PhD

Student - Teacher Ratio

Are you looking for a place that will know your name and not treat you just like another number? That's exactly what you'll get at the LSU School of Public Health.

With three students to every faculty member, you will be learning in an environment where everyone knows your name and fosters your passions.

Epidemiology

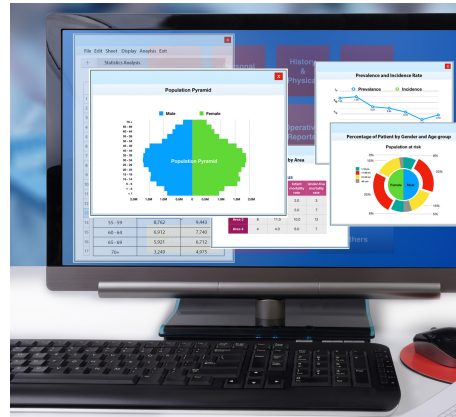

Overview

We are facing an unprecedented need for individual training in Epidemiology because of an increasing local, state, national, and global focus on critical public health issues.

Considered a cornerstone methodology of public health research, epidemiology is highly regarded in evidence-based medicine for identifying risk factors for disease and determining optimal treatment approaches to clinical practice.

Our faculty in the Epidemiology (EPID) program have multi-faceted interests and expertise in the epidemiology of

- Cancer
- HIV/STIs
- Health disparities
- Infectious and zoonotic disease and chronic disease
- Cardiovascular disease,
- Obesity/physical activity
- Hospital epidemiology

Scholarships and Assistantships

The School of Public Health and the EPID program make scholarships available for incoming Master-level students or assistantships for full-time PhD students as funding permits. These are competitive based on admission information and will be awarded to begin each fall semester to new students enrolling for the first time in the fall OR students who enrolled as a new student in the spring or summer term of the same year.

Additionally, the EPID program, and its faculty, generate several funding opportunities that allow students to apply for paid student work. For more information about these opportunities, visit <https://sph.lsuhsu.edu/jobs>

MPH Students :

In order to qualify for a scholarship, applicants must have all application materials in by the priority scholarship deadlines for each semester. A list of these deadline dates can be found on our website in the "Tuition and Aid" section. No additional forms are needed.

PhD Students :

A limited number of assistantships are available to full-time students pursuing a PhD in Community Health Sciences, Biostatistics and Epidemiology. Assistantships entail a commitment of up to twenty hours per week working with faculty on research projects or in a teaching capacity.

How to Apply

All applications must be submitted through SOPHAS by the application deadline. For additional information about applying as an International Student, you can go to our website.

All application packets must include:

- SOPHAS application & application fee
- Statement of Purpose and Objectives
- Resume or CV
- Letters of recommendation (3)
- International Students may have additional requirements.

Admission Requirements

- A baccalaureate degree (for MPH) or a Masters degree (for PhD) from an accredited college or university
- A suggested grade point average of 3.0 for undergraduate and graduate work based on a 4-point scale
- Official Graduate Record Exam (GRE) or Medical College Admission Test (MCAT) score may be submitted but is not required for MPH. **The GRE is a requirement for all PhD programs.**
- Satisfactory standing at the most recent educational institution attended
